A decorative graphic consisting of several parallel white lines of varying thicknesses, slanted diagonally from the bottom-left towards the top-right, located on the right side of the slide.

WELLS FARGO

On this presentation Mr. Elton explained how everything works and told us to ask him questions so that we can understand everything.

SUNTRUST.

On this presentation they come and thought us a lots of thing like savings and credit.

COMPARING THE BANKS

- ▶ Both banks helped me to know about credit and banking system.
 - ▶ The Wells Fargo had a long presentation about how to use a money.
 - ▶ The SunTrust bank mostly thought me how to bank and the general knowledge of banks.
- 

WHICH ONE WAS BETTER?

- ▶ The wells Fargo was better because we were in the actual bank and also we get to be divided in to 2 groups so that we can ask questions freely and also Mr.Elton got to answer all of our questions.
 - ▶ The wells Fargo presentation was more detailed and easy to understand. He also thought us about how the bank works. The interest rate and that there is no a service fee for teens.
 - ▶ He even thought us about how to make plans and how actually investing in banks help us for the future,
- 

WHAT HAVE I LEARNED ABOUT?

- ▶ I have learned about how to create a credit card and what the use is and how much important it is. That I can't get a credit card till I am actually 18 and above. And if I have a good credit score my interest rate will decrease and if I have a bad credit score my interest rate will increase. It's easy to destroy my credit history but to bring it back up takes a lot so we must be careful about this and a bad credit score will be kept in my credit score for 7 years so we must be very careful about that. Now a day banking is not that hard because there is online banking and we can access our money easily. So we should pay everything on time. I am going to use credit card wisely I am going to buy things from my credit card and pay it off from my debit card.
